

Station Manager API

Are you using the Station Manager console? [Click here for the Station Manager console user manual](#)

This document is intended for developers who want to write applications that interact with Station Manager. Two APIs are available for use:

1. a public API, used to return basic station information. [Learn about the public Station Manager API](#)
2. an internal API, used to return station information, including Passport and PDP data. [Learn about the internal Station Manager API](#)
