

Image Request Using Height Only

Let's say we need to fit a 3648 pixels wide x 2736 pixels high image into a space with a height of 200 and an undetermined width. Our request string will now look like this: <http://image.pbs.org/demo/demo1.jpg.resize.x200.jpg>. The missing dimension is left blank. Figure 4 demonstrates resizing by height only.
